

## HEALTH, SAFETY AND ENVIRONMENT SYSTEM POLICY

Dynamox S.A. guides its health, safety and environmental management systems based on the following principles:

- Manage issues related to risks and opportunities, constantly monitoring health, safety and environmental issues.
- Promote actions that meet the legal aspects of the organization, related to health and safety at work and environmental management.
- Systematically evaluate the environmental aspects and impacts of its operations, acting in a preventive manner.
- Consider the environmental and occupational safety impacts in the value chain and in the established partnerships.
- Establish and manage the objectives and goals related to issues of work safety and environmental performance.
- Encourage a culture of protection and continuous improvement of activities aimed at health and management of natural resources, through education and permanent qualification.
