

QUALITY POLICY

Quality Policy

Objective

The purpose of this document is to present the company's Quality Policy.

Quality Policy

Dynamox S.A., through its integrated management system, guides the production of temperature and vibration sensing devices, with wireless communication interface, for monitoring industrial machinery and equipment and the production of instruments for collecting and transmitting data from temperature and vibration sensing devices, based on the following principles:

- Systemically manage processes with a focus on quality and meeting the customers and other interested parties' expectations.
- Permanently monitor and mitigate the risks inherent to the business.
- Maintain a suitable and safe working environment for the workforce.
- Strengthen business relationships with suppliers in order to improve performance.
- Respect the laws and regulations applicable to the business.
- Attract, retain and engage talents by promoting the professional development of employees.
- Continuously seek to improve and innovate processes and the management system.
